# HOW TO USE

## UNBOXING

Once you receive your Platinum Vacuum Storage Containers, please register your lifetime warranty online at [www.platinumcookware.com/warranty](http://www.platinumcookware.com/warranty), so we can continue to make sure you have an exceptional product experience for generations to come.

Before first use, remove all packaging and labels. Wash your new Vacuum Storage Container with warm soapy water.

## USAGE

Seal in food freshness for storage in the fridge, pantry, or on the go! Platinum Vacuum Storage Containers allow you to enjoy the convenience and benefits of storing food, conserving leftovers, and minimizing food waste. To use Platinum Vacuum Storage Containers, press down on pump knob to remove air. It usually takes 10-15 pumps to remove the air out of the 1 LTR vacuum container. Press and turn to the right completely for Vacuum Lock; the arrow indicates Vacuum Lock. To release, turn left and push the black button to release vacuum. Platinum Vacuum Storage Containers are also stackable to maximize countertop, cupboard and kitchen space. Durable materials resist thermal shock and cracking.

## CLEANING & CARE

All containers and lids can be safely washed in the dishwasher. You can also use hot soapy water and a scour scrub sponge to clean container and lids. Make sure you rinse well and dry thoroughly for long lasting care.

Each container is heat-resistant for reheating in microwave oven. However, the lids are not microwave safe since the lids have a stainless steel pump. With the Platinum Vacuum Storage Container you can keep food fresh much longer, save food cost, reduce food waste and enjoy convenient dishwashing.

## LIFETIME GUARANTEE

Each Platinum Vacuum Storage Container comes with a Lifetime Guarantee. Register your product online to receive faster customer support, special offers and more.

18-PIECE CONTAINER SET

## BPA FREE

Store your foods in the most healthy manner possible. Platinum Vacuum Storage Containers are made from the finest, food grade, BPA free SAN/ABS plastic and are designed to provide years of safe and hygienic food storage for you and your family.

## HIGH STRENGTH VACUUM PUMP

Platinum Vacuum Storage Containers protect food from dehydration and freezer burn because of its high strength pump. Freezer burn occurs when frozen food is exposed to air causing dehydration and oxidation. Often, the reason food gets exposed to air is because the food had not been firmly wrapped in an air-tight package, letting trace amounts of air to come into contact with it. One sign your food has freezer burn is that the color changes, this is due to chemical changes in the food's pigment.

## STORAGE STACKING

Maximize your space with our stackable containers. Your containers are made to fit onto any countertops, cupboards, pantries, and refrigerators of all sizes. The shape of the containers also allows them to stack into small places on the go. Your containers will literally stack up against the competition!

## STAINLESS STEEL PUMP KNOB

Platinum Vacuum Storage Containers have a sturdy, high grade stainless steel pump knob that you can't tear apart. The stainless steel knob is attached to the lid, making it easy for clean and care. Because of its high quality material it is easy to use, quick and efficient. Both the lids and stainless steel pump knobs are made of durable, high-impact materials, making containers strong from external shock.
